## Installing this Product

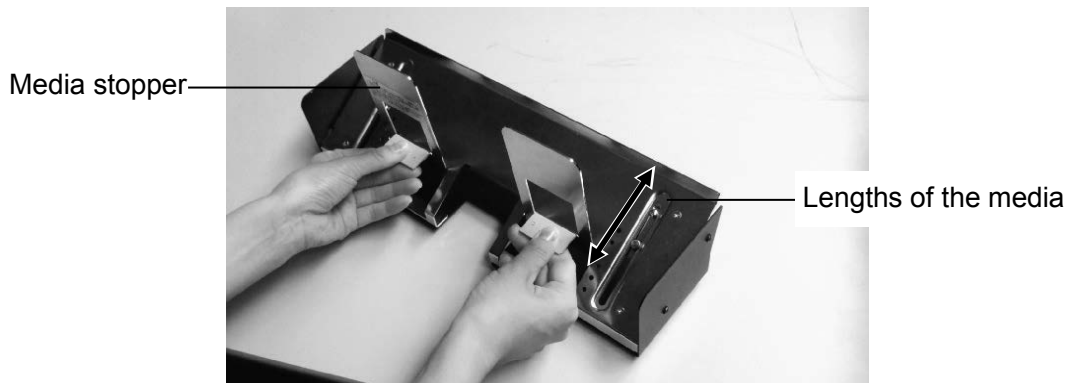

**CAUTION**

- Set up this product on the same floor as the SG112-ex main unit so that the SG112-ex and this product do not protrude from desks, etc.
- When setting this product on the floor or a stand, make sure not to get your fingers or hands pinched.
- Do not carry this product with media loaded in it. The media could fall out and cause an injury.
- Be careful in handling this product so that injuries are not sustained from this product's corners.

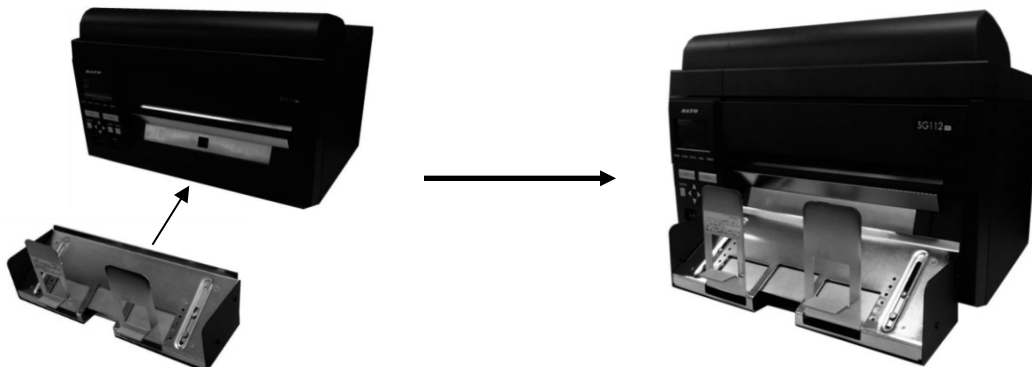

1. Set and install the Media guide hook on the SG112-ex's Media discharge outlet.  
Depending upon the media's size, the Media guide does not need to be installed.

2. Adjust the position while pushing on the Media stopper's [PUSH] section.  
Match the lengths up to the Media stopper from the ends of this product to the lengths of the media.

3. Place this product in front of the SG112-ex's Media discharge outlet.  
At this time, set this product and the SG112-ex so that there is no clearance in between them.

\* In this product the media is stacked up to a height of 35 mm.

Remove the media before it exceeds 35 mm. Not doing so may cause a media jam.
