

PV4

A compact and powerful mobile printer

PV4 Mobile Printer.

Designed for powerful on-demand labelling across a diverse range of industries.

With the demand for cloud-enabled technology increasing year-on-year, businesses now seek IOT devices to deliver more than just the essentials in label printing. Next-generation solutions from SATO are designed to improve customer satisfaction, enhance productivity and provide a consistently accurate track and trace service for peace of mind.

That's why we are proud to introduce the PV4, a highperforming mobile printer engineered to meet the requirements of on-demand label printing environments.

Logistics

Enhance efficiency across all aspects of the supply chain

Labels required through the supply chain including goods receipt, racks, and returned goods labels, can be printed efficiently by the PV4. It comes with major competitive emulations for seamless integration into existing workflows.

Product labelling for enhance traceability and efficiency

Built for tough industrial conditions, the PV4 mobile printer helps manufacturers gain clear visibility and traceability from raw materials to finished products, which is especially valuable in the event of a product defect. It has a durable polycarbonate body and rubber over-molded edges that absorb the force of an impact, a vital attribute in the manufacturing environment.

Healthcare

Improve accuracy and efficiency to ensure the safety and satisfaction of patients

From patient registration, lab tracking and asset management in healthcare facilities to the manufacturing, dispensing and distribution of pharmaceutical products, this next generation intelligent printer delivers accuracy and efficiency for users, enhancing safety of patients and consumers.

Powered On Site /

Achieve all your on-demand printing needs with one complete dynamic solution

Simple Operation

An intuitive user experience with a simple and easy to use screen and menu layout

Integrate and Connect

- The SATO PV4 printer has exceptional compatibility. Third-party emulations including SLCS, BPL-ZTM and BPL-CTM ensure it is a simple process to replace existing printers without creating complex new workflows and enables simple integration for IT departments.
- In addition, connectivity options such as WiFi, Bluetooth 4.1, USB 2.0, NFC support, Android and iOS compatibility offer an enhanced user experience.
