

RFID In-hospital Solutions for Patient Safety and Resource Savings

Increase patient safety in hospital

CT4-LX RFID

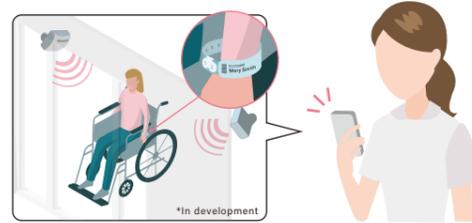

Keep it easy for patient

Patient's RFID wristband can be scanned from even over a blanket, thus enabling identity verification before treatment/care without waking patient up.

Prevent patient from leaving without permission

Utilise RFID gates to scan patients who pass through them and prevent patients from leaving hospital facilities without permission.

Save time and costs in daily asset management

CL4NX RFID

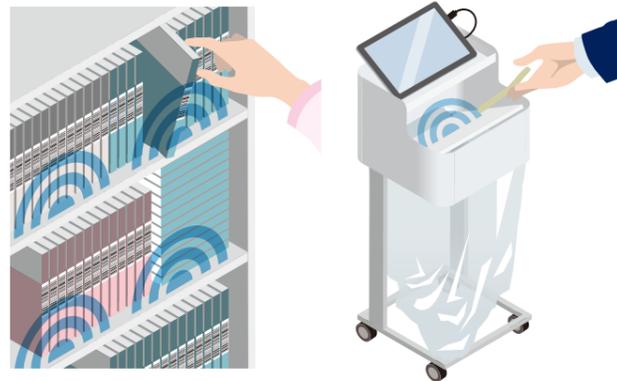

Asset Management with RFID

Manage incoming and outgoing equipment

Manage disposal of single-use medical device

Leverage RFID technology to effectively manage a wide variety of inventories, assets and other items more efficiently including:

- Medical devices such as implants, etc.
- Medical equipment and other assets such as wheelchairs, pumps, etc.
- Waste disposal

SATO Enhances Safety and Security in Healthcare Facilities

Medical Ward

Ensure accuracy of patient ID confirmation

Using wristbands, patient ID can be matched with injection syringes and blood collection tubes before treatments.

Ensure accuracy of medication confirmation

Labels are printed at the ward after medication preparation. These labels are easy to peel off in case medication orders are changed or cancelled.

Enhance efficiency by printing labels on demand

Specimen label can be printed right at patient's bedside with our mobile printer.

Achieve ideal specimen label

Our labels for blood collection tubes are strongly adhesive yet can be removed cleanly. They are alcohol resistant as well.

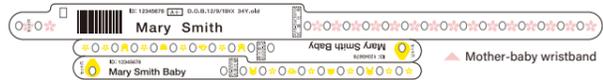

Maternity ward

WS2 CT4-LX

Eliminate risk of newborn mix-up and ensure accurate mother-baby matching

With all-in-one Mother-baby wristband, the baby ID wristband can be detached directly from the mother wristband and attached to the newborn soon after delivery.

Patient Registration

WS2 CT4-LX

Positive identification even for outpatients

Wristbands designed for short-term wear are used for outpatients. Also, visitor labels and rewritable appointment cards are available.

Kitchen

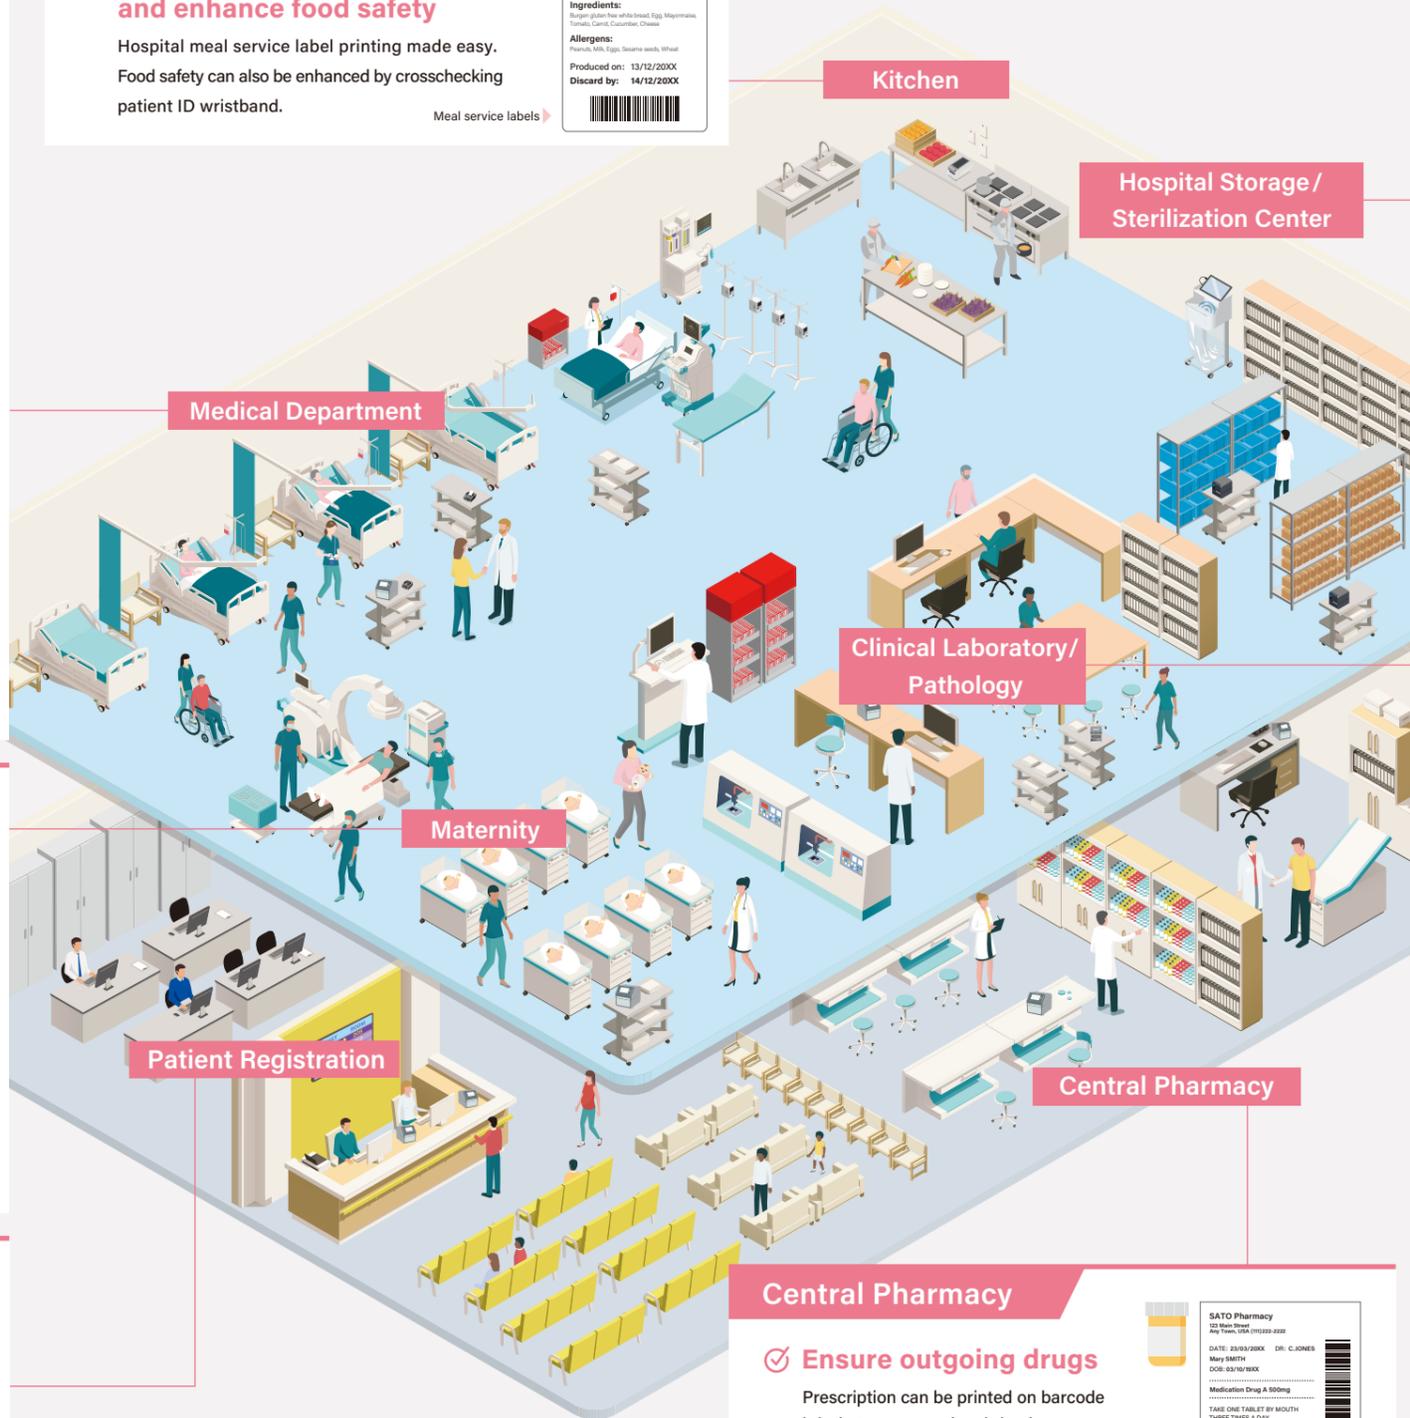

Manage dietary requirements and enhance food safety

Hospital meal service label printing made easy. Food safety can also be enhanced by crosschecking patient ID wristband.

Egg Sandwich

Ingredients:
Burger (plain) white bread, Egg, Mayonnaise, Tomato, Caramelized Onions, Cheese
Allergens:
Peanut, Milk, Eggs, Sesame seeds, Wheat
Produced on: 13/12/20XX
Discard by: 14/12/20XX

Meal service labels

Hospital Storage/Sterilization Center

Manage internal equipment loans with accuracy

Track and manage internal loans accurately using barcode labels attached to each equipment and device.

Streamline usage and inventory management

Efficient replenishment can be achieved by tracking each device/equipment with removable labels or cards printed with barcode.

Achieve accurate & efficient billing

Streamline billing process and ensure bill accuracy by tracking devices used with their removable labels.

Medical administration information sticker

Clinical Laboratory/Pathology

Manage specimens in pathology tests using special labels

Labels that are resistant to special types of solvents are used to enable barcode-based management in pathological tests.

Improve management of processed samples

Labels for aliquoted samples and outsourced tests are printed. These labels can be modified for microplates and petri dishes.

Enhance management of blood products for patient safety

We provide solutions for printing compatibility labels, labels for autologous blood and segment labels. Match information on labels with electronic health records for further authentication/verification.

Central Pharmacy

Ensure outgoing drugs

Prescription can be printed on barcode labels to ensure the right drugs are prescribed to the right patient. Labels for liquid container are also available.
