

CLNX Plus Barcode Checker add-on-module Installation Instructions

1. Prepare the Main Holder

2. Install the scanner onto the holder:

- Place the scanner onto the holder.
- Use small screws and washers.
- Screw the scanner into its correct position with the first screw.
- Mount and secure the second screw into the bracket.
- Tighten both screws to secure the scanner.

3. Move to the Printer Mounting:

- Remove two of the three front covers screws of the printer.
- Take the bracket off the holder.
- Place the bracket in the top position.
- Close and tighten the screws that were removed.

4. Reposition and assemble:

- Put the assembly down as shown.
- Move it to the side so the scanner faces inward.
- Screw from the bottom using a flat washer and then a tag washer.
- Unscrew and open the relevant part, adjust its position, and close it back.
- Move the bracket sideways if needed and secure the cable at the back.

5. Cable installation and final steps:

- Open the lid.
- Unscrew one screw.
- Route the cable in between parts.
- Slide in the plastic part and screw it back in place.
- Close the lid.
- Move to the rear, take the cable, and roll it in.
